JOB MARKET SKILLS & SALARY ANALYSIS

Data Analytics Dashboard • Project ID: DA-021 • Group ID: BT_DA_03 • Section A • Mentor: Arsh Singh

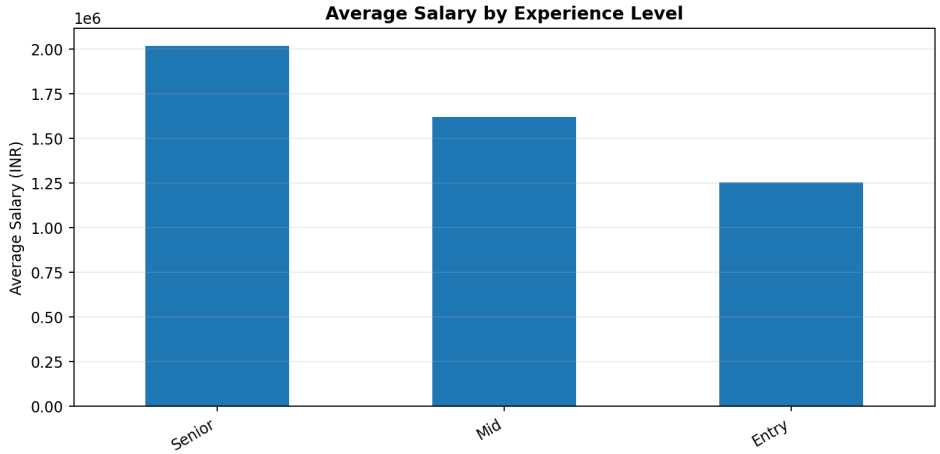

Total Job Records	Average Salary	Median Salary	Highest Salary
500	₹1,519,220	₹1,495,000	₹2,690,000

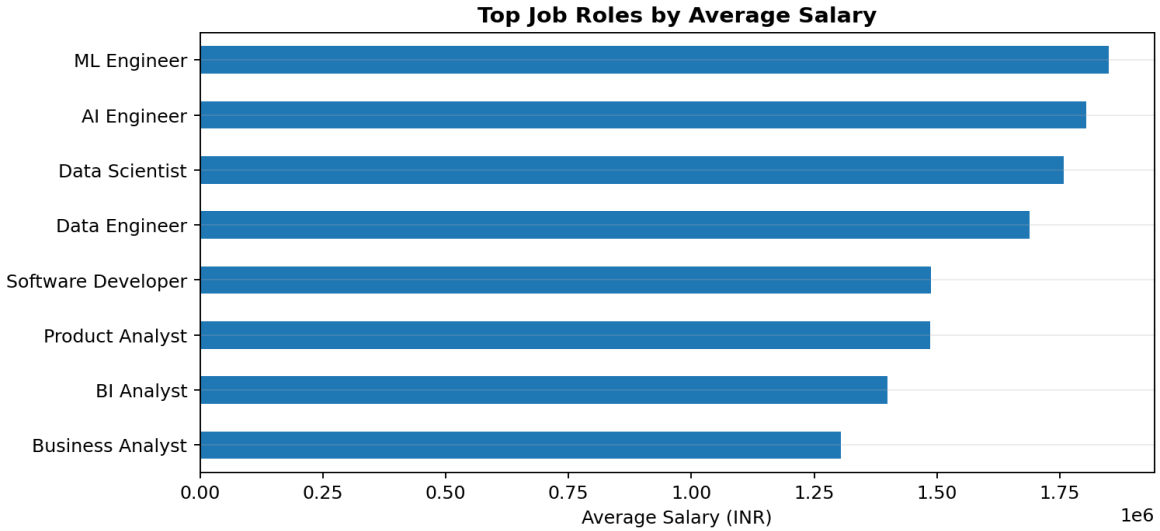

Project Overview

Analysis Area	Covered in Dashboard
Salary Analysis	Average, median, highest salary and salary comparisons
Experience	Entry, Mid and Senior salary patterns
Job Roles	Average salary comparison across job roles
Skills	Most demanded skills and skill-associated salary
Locations	Location-wise average salary
Correlation	Experience, skill count and annual salary relationships

SALARY & EXPERIENCE ANALYSIS

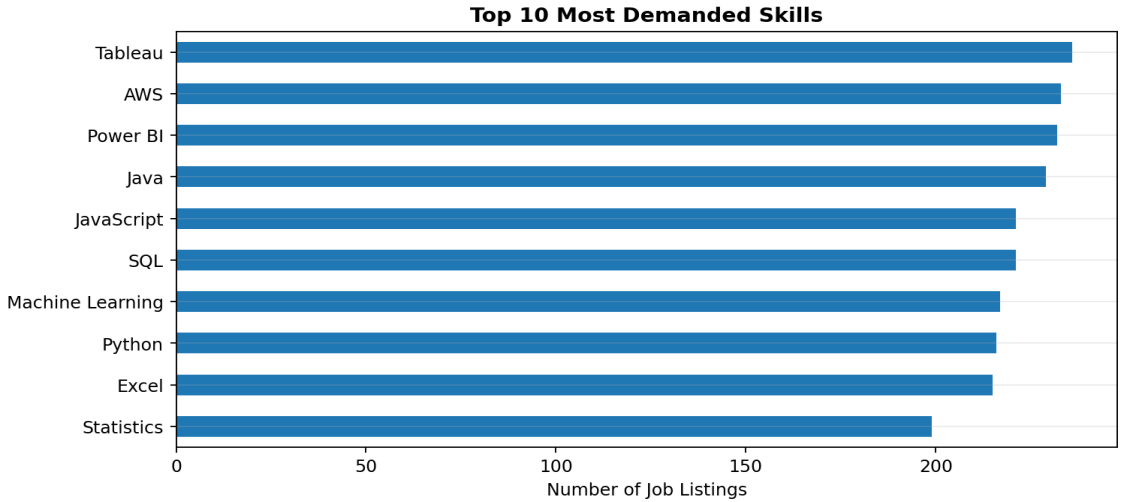

Salary patterns across experience levels and job roles.

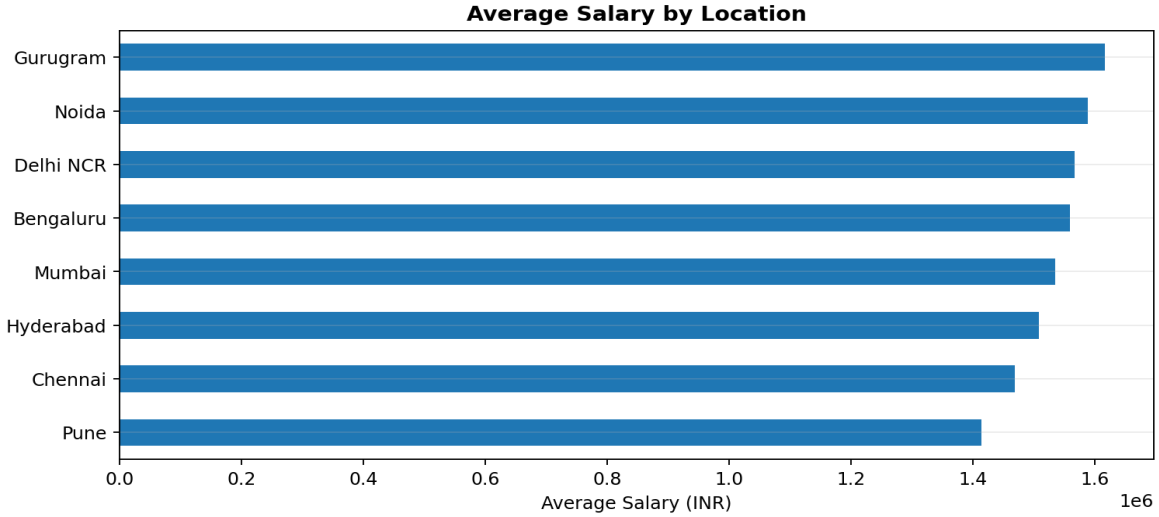

SKILLS & LOCATION ANALYSIS

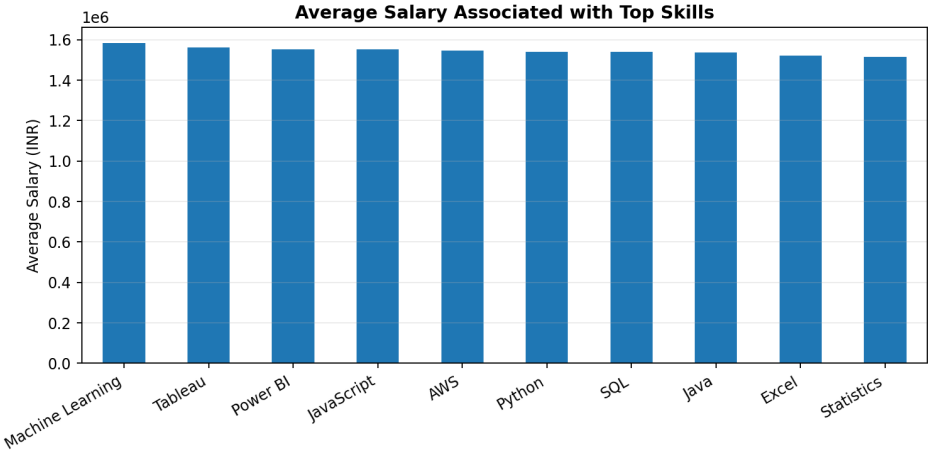

Technical skill demand and location-wise salary patterns.

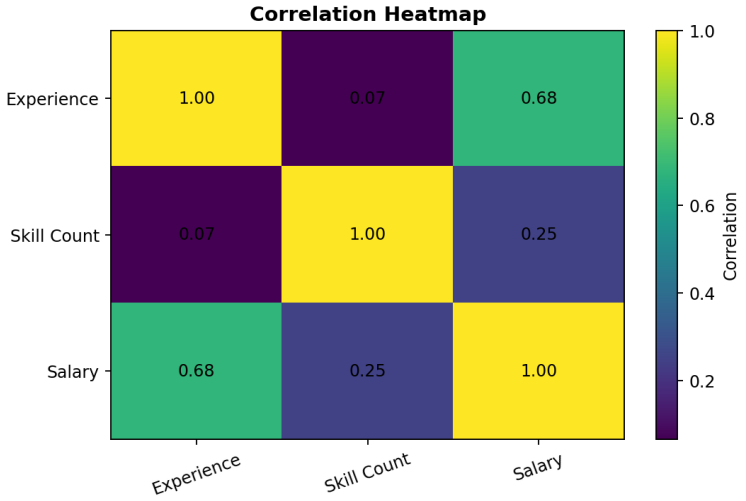

SKILL–SALARY & CORRELATION ANALYSIS

Connecting technical skills, salary, experience and skill count.

Key Insights

- Average salaries can be compared across job roles and experience levels.
- Location-wise analysis helps identify locations with comparatively higher average salary levels.
- Skill-demand analysis identifies technical skills appearing frequently in job listings.
- Skill-salary analysis connects technical skills with job counts and associated average salary.
- Correlation analysis examines relationships among years of experience, skill count and annual salary.
- The combined analysis shows that job-market patterns are influenced by multiple factors rather than a single variable.

Project Takeaway: Understand the market. Build the right skills. Prepare for the future.
